精益求精 改变从我做起

公司简介

沈阳水泥机械有限公司是中国机械工业骨干企业，是中国建材行业龙头企业，是中国建材机械行业十强企业和辽宁省高新技术企业。中国第一台水泥回转窑、第一台篦冷机、第一台熟料破碎机都在这里诞生。

公司占地12.2万平方米，建筑面积4.1万平方米，拥有重型及数控设备400多台套，主要生产各类水泥机械及冶金、石油、化工、电力等行业的机械产品。公司还具有I、II类压力容器的设计和制造资质。

公司以“培育一流企业团队，打造中国名牌产品”为企业经营理念，坚持以技术创新为企业发展方向，实行自主创新和引进技术相结合。公司主导产品水泥工业用篦冷机是引进国外先进技术，经过消化、吸收和再创新，使之成为水泥生产线上的重要节能减排设备，是公司具有自主知识产权的核心竞争产品，多次获得辽宁省“名牌产品”和中国建材行业“名牌产品”称号。公司生产的大型回转窑和球磨机也获得建材行业“名牌产品”的称号。

公司坚持以水泥机械为主，兼顾拓展行业外和国际市场的三大经营战略，几年来完成了数十条活性石灰生产线和煅烧白云石生产线，具备了从总体设计、设备制造、安装调试到达产达标的总承包能力。

公司还与国际知名公司结成战略合作伙伴，利用国外先进技术，结合自身优势大力推行出口战略，产品远销南美、南亚、欧洲、非洲和中东等三十多个国家和地区，优质的产品和优良的服务，深受广大用户的信赖。

公司建立了全新的现代化企业管理制度，通过了ISO 9001质量管理体系，ISO 14001环境管理体系和GB/T28001职业健康安全管理体系认证。连续多年获辽宁省“质量管理先进单位”、“安全生产标准化单位”和中国建材机械行业“AAA级信誉企业”等荣誉称号，公司商标被评为辽宁省“著名商标”。

2009年，公司又被评为“改革开放三十年中国建材行业功勋企业”及“中国工业经济先锋全国示范单位”荣誉称号，并荣获了沈阳市政府颁发的“五一劳动奖状”。

Brief Introduction

Shenyang Cement Machinery Co.,Ltd is the leading enterprise in Chinese Machinery Industry and Building Material Industry, the top ten enterprises in Chinese Building Material Machinery Industry and high and new tech enterprises of Liaoning Province. The first cement rotary kiln, grate cooler and clinker crusher were made in our company.

Our company occupies 122 thousand square meters and the construction area is 41 thousand square meters. we are equipped with more than 400 sets of heavy and numerical control equipments. The main products are: various kinds of cement machinery and the machinery for metallurgical, petroleum, chemical industries and power plant, etc. We are qualified to design and fabricate the pressure vessel class I and class II.

Pursuing the enterprise spirit of cultivating first-class team and creating China Top Brand and insisting on technic innovation, Shenyang Cement Machinery Company carries out the policy of developing independently and technology introducing. Grate cooler—the main product is introduced from abroad and it becomes the important energy saving equipment through digesting, absorbing and renovation. Grate cooler is the key competitive product which is awarded the "famous brand" by Liaoning Province and Chinese Building Material Industry for several times. The large-sized rotary kiln and ball mill are also awarded "famous brand" by Chinese Building Material Industry.

Shenyang Cement Machinery Co.,Ltd insists on the tactic of taking cement machinery as principal and developing other industries and international market. During the several years, we have manufactured tens of lime production lines and dolomite burning production lines and we have the turn-key capability from general design, equipment manufacturing, installation and commissioning to meet the prescribed standard.

Our company carries out the export strategy by cooperating with world famous company, utilizing oversea technology and combining ourselves advantage. Our products are sold to more than 30 countries and area, such as South America, South Asia, Europe, Africa, Middle East, etc. Quality products and excellent service are trusted by the clients.

Shenyang Cement Machinery Co., Ltd builds completely new and modern management system. We obtained certificate of conformity of ISO 9001 Quality Management System, ISO 14001 Environmental Management System Certificate and GB/T28001 Occupational Health and Safety Management System Certificate. We are awarded provincial "Advanced Unit" in Quality management, "Standardization Unit in Safety Operation" and "AAA Credit Enterprise" in Chinese Building Material Industry, etc. Our trade mark is awarded provincial "famous brand".

粉磨设备 Grinding equipment

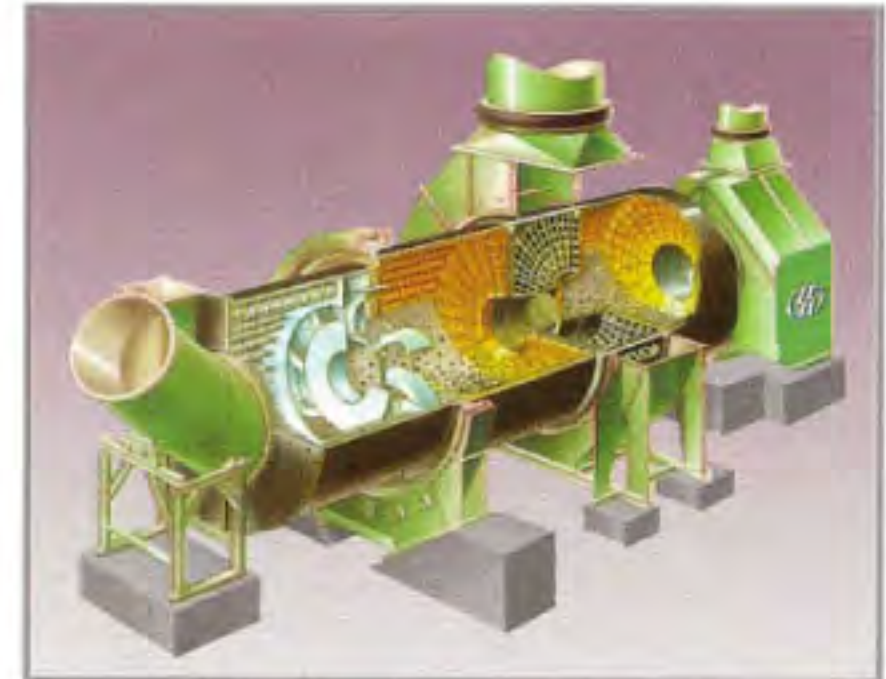

管磨机 Tube mill

管磨机是水泥生产的主要设备之一，用于粉磨生料、熟料、煤粉、矿渣和其它混合材料，也广泛应用于冶金、矿山、电力、化工等行业。

管磨机具有对物料适应性强、破碎比大、易于调整粉磨产品的细度等特点。按其支承形式，可以分为中空轴、单滑履、双滑履磨；按其传动系统可分为：边缘传动、单边双传动、中心传动。

Tube mill is one of the main equipments for cement production, adopted to grind the raw meal, clinker, coal, slag and other mixtures and widely used in metallurgy, mine, electricity, chemistry industries.

The tube mill possesses the features of strong adaptability, great crushing ratio, easy to adjust fineness of products, etc. It can be divided into hollow trunnion, single slide shoe mill, double slide shoes mill according to the supports; it can also be divided into edge drive mill, single-edge double drive mill and center drive mill according to the drive system.

粉磨设备 Grinding equipment

立式磨机 Vertical roller mill

立式磨机用于粉磨水泥生料或水泥熟料及其它建筑、化工、陶瓷等工业原料，具有体积小、重量轻、占地少、电耗低、易损件寿命长等一系列优点，因此，近年来在国内外大中型水泥厂得到广泛应用。

公司生产的立磨能满足日产5000吨水泥生产线的需要。

Vertical roller mill is used to grind raw meal or clinker and other industrial raw material of building, chemistry, ceramics industries, etc. The vertical roller mill features a series of advantages such as small volume, light-weighted, small occupied area, low electricity consumption, long life of wear part, etc. therefore, it is widely used in the large & medium-sized cement plants domestic and abroad.

The vertical mill manufactured by SCMC can meet the demands of 5000 tpd cement production line.

粉磨设备 Grinding equipment

辊压机 Roller press

辊压机是80年代中期发展起来的新型节能水泥粉磨设备，配合球磨机系统可以大大提高粉磨效率，并有降低钢材消耗及噪音的功能。辊压机适用于新厂建设，也可用于老厂技术改造。辊压机辊面采用热堆焊，耐磨层维修更为方便。

The roller press was developed for the cement grinding for the purpose of energy saving in middle of 1980's. The press roller working together with the ball mill system can greatly increase the grinding efficiency and reduce the steel consumption and noise. The roller press is not only suitable for the new built plant but also for the old plant upgrading. The roller face is heat weld buildup. It is easy to maintain on the abrasive layer.

煅烧设备 Calcining equipment 预热器 / 回转窑 Pre-heater / Rotary kiln

预热器、分解炉是回转窑水泥厂煅烧系统的重要组成部分，是提高水泥产品质量，降低热耗的主要设备。我公司生产的2000tpd~5000tpd预热器分解炉采用低压损结构，具有系统阻力小、分解率高、热耗低等特点。

Pre-heater and the pre-calciner are important equipments in calcining system for rotary kiln plant and also the main equipments for increasing the cement quality and lowering the heat consumption. The pre-heater pre-calciner of 2000tpd~5000tpd produced by our company adopts low pressure-loss structure and it has the characteristic of low system resistance, high decomposing efficiency and low heat consumption, etc.

日产4000吨水泥生产线
4000tpd cement production line

日产3400吨水泥生产线
3400tpd cement production line

四川峨胜水泥公司是我国年产1000万吨特大型水泥生产企业，先后五条日产5000吨生产线中的5台 $\Phi 4.8 \times 74m$ 回转窑，9台 $\Phi 4.2 \times 13m$ 磨机等主机设备全部由我公司制造，是我公司在四川水泥装备靓丽的风景线。

在水泥工业中，回转窑是煅烧水泥熟料的重要设备。进入回转窑的生料在高温作用下，经过一系列的物理化学变化而成为熟料。回转窑的技术性能和运转情况，在很大程度上决定了水泥的质量、产量和成本。回转窑的规格和生产能力，也决定了整条水泥生产线的规模，所有其它设备是根据回转窑的各项参数来配置。

我公司拥有开发制造2000tpd~10000tpd不同规格回转窑的能力，产品不仅装备在水泥行业，而且为冶金、化工等行业提供优质的回转窑设备。

In cement industry, rotary kiln is the key equipment for calcining the cement clinker. The raw meal fed into the kiln becomes into clinker after a series of physical chemistry change under the high temperature. The performance and the operation situation of the rotary kiln decide the cement quality, output and the cost to great extend. The specification and the capability of the rotary kiln also decide the size of the cement production line and other equipments shall be matched according to the parameter of the rotary kiln.

We can develop and manufacture the rotary kilns which capacity from 2000tpd to 10000tpd and the kilns are not only applied in cement industry but also for metallurgical and chemical industry.

冷却设备 Cooling equipment 篦式冷却机 Grate Cooler

公司具有四十多年的篦冷机制造经验。1965年制造出中国第一台篦冷机，1985年引进国外先进的设计和制造技术，经过吸收和再创新，已经成为具有自主知识产权的产品。至今已制造出800多台篦冷机并安装在国内外水泥生产线上，先进的技术、可靠的质量和优质的服务受到广大用户的信赖，已成为中国篦冷机第一品牌。

SCMC is experienced at grate cooler manufacturing. In the year of 1965, we made the first grate cooler in China and introduced the advanced design and manufacturing technique from abroad in 1985. Through absorbing and renovation, it has become the product with own intellectual property rights. Up to now, more than 800 sets of grate coolers are installed in the cement production lines domestic and abroad. The advanced technology, reliable quality and excellent service are trusted by the clients and the grate cooler is the first brand in China.

在《首届全国工业企业技术进步成就展览会》上，江泽民主席看了我公司生产的篦式冷却机模型，并且给予很高的评价。

Preident Jiang Zemin highly praised our grate cooler at the exhibition of the first National Industry Technical Progress & Achievement.

The first grate cooler in China

日产6000吨液压传动篦冷机
6000tpd hydraulic drive grate cooler

SLTJ推动式均流冷却机 第四代篦冷机

SLTJ reciprocating flow-control cooler

SLTJ推动式均流冷却机是我公司独立自主研发设计的具有国际先进水平的第四代冷却机，在第十八届全国发明展览会上获得金奖。

该产品具有如下特点：

- 采用模块化标准组合设计，满足各种规格生产能力要求；
- 冷却机篦床采用固定结构，大幅提高篦板使用寿命；
- 篦板下设置单独供风控制阀，实现高效率、低能耗；
- 采用无磨损摆动限位支承和滑动轴承多点支承，运行安全可靠；
- SLTJ冷却机无需篦床下漏料控制及输送装置，便于安装维护，对自身和煅烧系统节省大幅土建投资。

SLTJ reciprocating flow-control cooler which developed and designed by ourselves is the fourth generation cooler and it reached the international advanced level and won the gold medal on the 18th national invention exhibition.

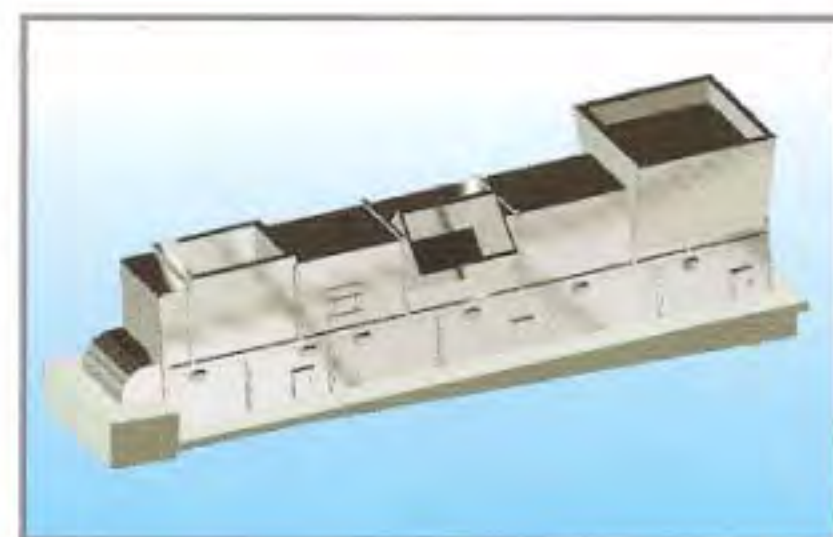

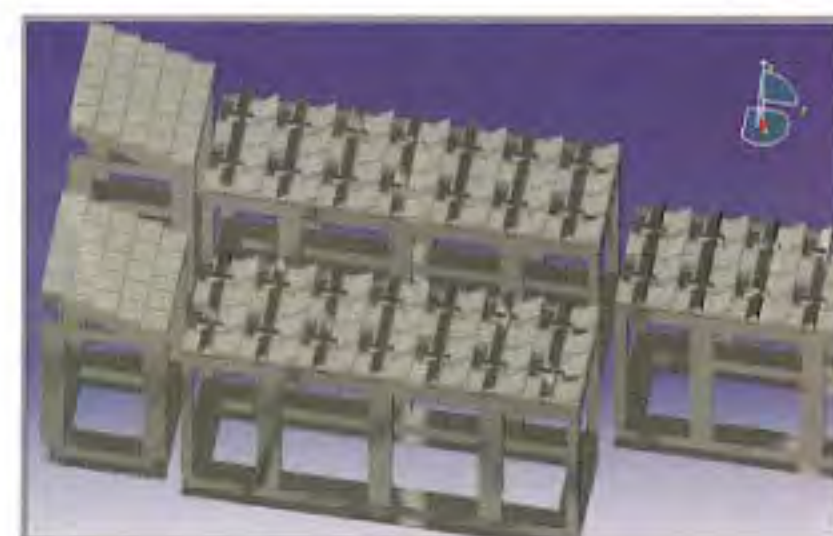

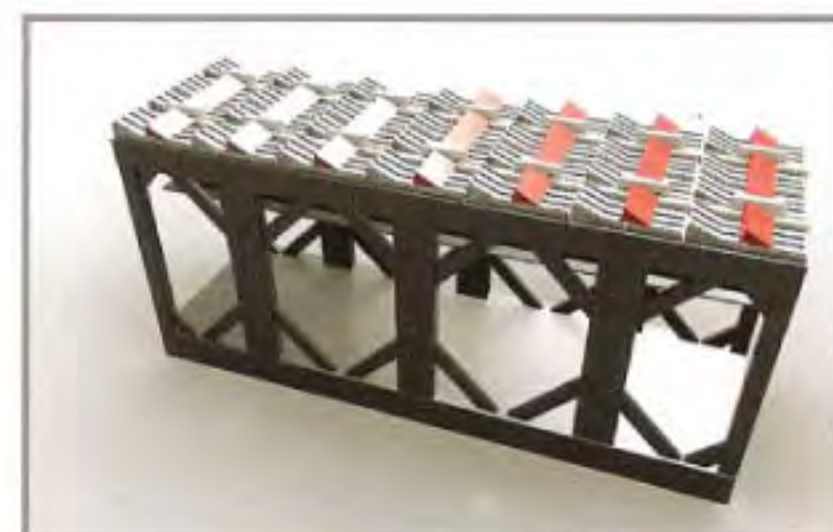

● SLTJ cooler adopts modular design which can meet different production requirements.

● The fixed grate bed structure improves the service life greatly.

● Separate air flow control valves are set under each grate plate which realize high efficiency and low energy consumption.

● Adopt non wear swing limit support device and slide bearing as multi-point support, so the operation is safe and reliable.

● There is not leakage control and conveying device under the grate bed in SLTJ cooler. The elevation of the equipment is lowered for the convenience of installation and maintenance. The civil construction fees for itself and the calcining system are reduced greatly.

6000tpd grate cooler

电力装备 Equipment for power plant

我公司目前的主要产品为各种类型的磨煤机，是生产磨煤机形式、规格、品种齐全的专业制造厂，可以生产各种形式（高、中、低速磨）的磨煤机，能够满足1000MW级火力发电厂的装备需要。

Our company mainly produces various types of coal mill which is the special manufacturer with full types, specifications and kinds of coal mills. The produced coal mill of full types (high-speed, medium-speed and low-speed) can meet the demands of 1000MW power plant.

中速磨煤机 Medium speed coal mill

我公司生产多个品种中速磨煤机。我公司生产的中速磨煤机采用液压变加载、高效动静态分离器、抗爆防爆技术等，高效节能。该产品广泛应用于电力、水泥、冶金、化工等行业。

Our company produces multiple types of medium-speed coal mills. The coal mill produced by our company has advanced technology; adopts hydraulic variable loads, highly efficient dynamic and static separator, antiknocking and explosion proof technique, etc. to realize high-efficiency and energy-saving. The product is widely used in the field of electricity, cement, metallurgy, chemical industry, etc.

中速磨煤机
Medium speed coal mill

双进双出磨煤机 Double inlet & outlet Coal Mill

该产品用在正压直吹式制粉系统，其特点是运行参数自动调节，磨煤电耗低（较普通钢球磨煤机低8~10%）、技术先进、自动控制水平高、要求具有很强的可靠性，属节能型高端技术产品。

The product is used in the positive pressure direct-fired system with the features of automatically adjusting the working parameters, low consumption of power (8~10% lower than ordinary steel ball coal mill), advanced technology, high level of automation and high reliability. It is a high-tech product of energy-saving.

双进双出磨煤机
Double inlet & outlet Coal Mill

风扇磨煤机 Beater Wheel Mill

主要应用于粉磨高水份、低热值的劣质褐煤。它是一种同时完成煤的磨碎，干燥和输送煤粉三大功能合一的高效制粉设备。具有系统简单，电耗和金属消耗量低，操作简单，噪声小等优点。特别是可以充分利用劣质煤资源，符合我国资源充分利用的产业政策。

Mill is mainly used to grind the bad quality lignite of high water ratio and low heat value. It is the high effective powder-making machine combined the functions of grinding, drying and conveying. The system is simple; electricity consumption and metal consumption are lower; operation is easy and the noise is low. It is special to make full use of bad quality coal sources and fit our country industry policy of making best use of resources.

设计能力 Design capability

公司的技术中心是辽宁省“省级企业技术中心”，围绕公司主要产品篦式冷却机、回转窑、管磨机、立磨、辊压机、活性石灰装备、I、II类压力容器、电站及风电设备，设置了水泥煅烧、粉磨、篦式冷却机、活性石灰设备、电站及风电设备设计室以及压力容器、工艺工装、标准化等专业设计研究室。

Our design center is affirmed the provincial Enterprise Design Center of Liaoning Province. The specialized design research departments are set, such as cement calcining and grinding, grate cooler, lime production equipments, power plant and wind power design division, pressure vessel, process and fixture, standardization division and so on for the main products of grate cooler, rotary kiln, tube mill, vertical roller mill, lime equipments, pressure vessels, power plant and wind power facilities.

售后服务 After-sale services

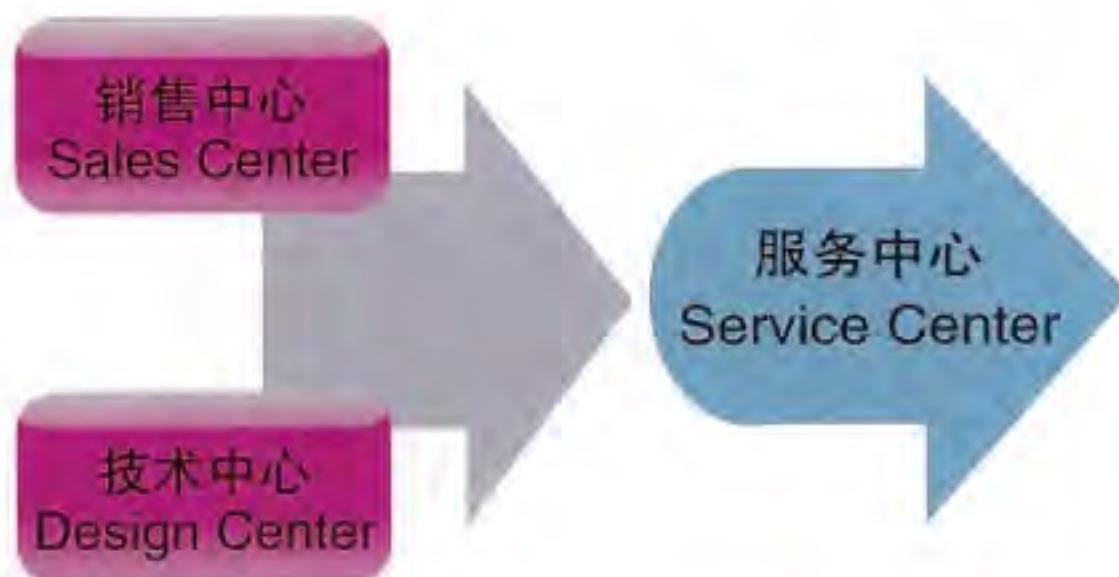

为满足用户需求，不断提高企业信誉，长期以来，沈阳水泥机械有限公司始终坚持“诚信守约，为客户提供优质服务”的经营理念，并将“为用户着想，对用户负责，让用户满意”作为售后服务标准，力求做到服务及时、准确，处理问题有效、满意。并形成了全方位，全程式的售前、售中、售后服务的理念，顾客满意度逐年上升。

公司售后服务质量管理小组在2005年被中国建材工业协会评为“全国建材工业优秀质量管理小组”，公司在2008年被评为辽宁省“守合同重信用单位”及中国建材机械行业“AAA级信用企业”。

To meet the client's requirements and improve the enterprise's credit, Shenyang Cement Machinery Co., Ltd always insists on the management idea of "keeps good faith and the appointment, provides good service for the client" and takes "be in the consumer's position, be responsible for the client and satisfy the consumer" as the after-sale services standard. We try to service the client in time and well and solve the problem with efficiency and satisfaction. We have formed an idea in all-dimensional and full range of presale, point-of-sale and after-sale and the client's satisfaction is increasing.

After-sale services quality management group was awarded "Excellent Quality Management Group of National Building Material Industry" by National Building Material Industry Association in 2005. In the year of 2008, our company was awarded the title of "Contract Abiding & Trustworthy Enterprise" by Liaoning province and was "AAA Credit Enterprise" of Chinese Building Material Industry.
